

# EVEREST

## MULTILAYER UVS

EVEREST Multilayer Universal Speed (UVS) combines our latest multilayer Zirconia technology to create a strong but transparent material with no compromise to shade stability in both speed and normal sintering. Suitable for single crowns and full arches, no variation in translucency or strength.

### Why EVEREST Multilayer UVS?

- Fast sintering Zirconia
- 30 minute sintering cycle (based on single crown)
- Same results in both Normal and Speed sintering
- **Same results in wide MAX temperature range (1500°C-1560°C)**
- Flexural strength, translucency, and shade stability
- For all indications (single crown to full arch, anterior and posterior)

# One Day Zirconia

## EVEREST Volcan Speed

Paired with EVEREST Multilayer UVS, sinter a crown in only 30 minutes and full arch in only 4 hours.

- 30 minute speed sintering mode
- Normal sintering- 2 layer tray capacity (90 Ø)
- Speed sintering- Maximum 5ea crowns
- **Shade stability and consistency**
- High purity and heat durability

## EVEREST

### Zirconia Pre-Polishing Felt

Paired with EVEREST Multilayer UVS and EVEREST Volcan Speed, finish restorations within one visit.

- Designed for polishing Zirconia before sintering
- Pre-polishing can save up to 30 minutes
- **Takes only 30 seconds**
