3D MULTILAYER UVS

Zirconia DISC & CEREC

THE 40 MINUTE CHAIRSIDE
ZIRCONIA CROWN

NEW

EVEREST MULTILAYER UVS

Zirconia Disc & Cerec

EVEREST Multilayer Universal Speed (UVS) combines our latest multilayer zirconia technology to create a strong but aesthetically transparent material without compromising the shade stability in speed and normal sintering. Suitable for single crowns and full arches, no variation in translucency or strength.

Strength
700 ~ 1150MPa / Translucency
49 ~ 45%

Size	Disc	Ø 98
	Cerec	20x19 / 40x19
Indication	For all indications  Anterior Crown Posterior Crown Bridge Full Arch	

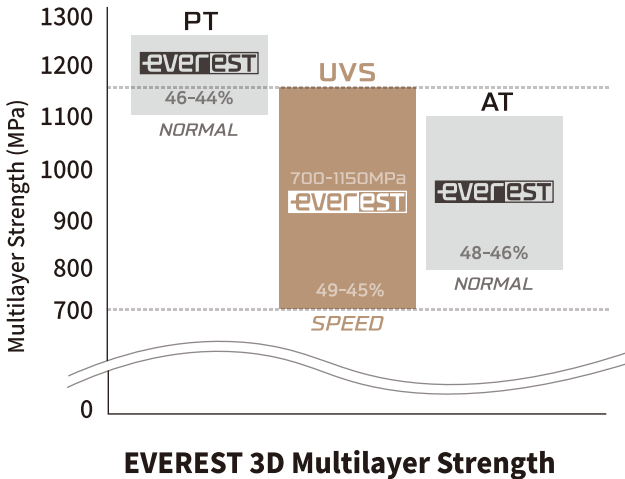

Try our new universal multilayer block that can be used in all cases.

01.

High strength,
High translucency,
Super fast.

- Outstanding biocompatibility, strength and esthetics.
- 40min rapid-sintering.
- In-Lab working time: Just one day

02.

Consistent translucency
and shading even with
rapid sintering.

- Same results in wide MAX temp.range (1500-1560°C)

EVEREST VOLCAN SPEED & MINI

High-Quality and High-Speed Sintering Furnace

- **Rapid Sintering:** Optimized heating cycles for faster sintering processes.
- **Low Oxidation Rate:** Preserves element integrity for extended durability.
- **High Thermal Strength:** Ensures stability for thin glazing and high surface loads.
- **Reliable Performance:** Delivers consistently high-quality results, free from contamination.
